### Rust Inhibitor

#1043 180g **\$4.95**

#1054 350 g **\$6.95**

#1044 4L Jug **\$53.95**

### Coat & Protect

#10024 4L **\$59.95**

#10025 350 g **\$7.95**

Rust Check protects metals by displacing moisture and treating the surfaces with highly effective corrosion inhibitors. The corrosion inhibitors form an adsorbed (bonded) layer on the metal surfaces. This microscopic layer acts like a series of tiny umbrellas, shielding the surfaces from water molecules. Just as a car battery will not work without its electrolyte, metal corrosion will not occur if moisture does not contact the metal.
