## AIR CONDITIONING / COOLANT TUBING REPAIR

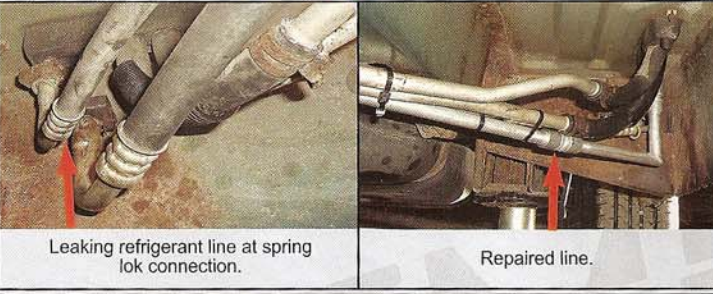

0379M - A/C REPAIR ASSORTMENT

Contains 35pcs

Special:  
**\$935.00**

During assembly of a connection, the tubes to be joined are inserted into a union, up to an internal stop. The assembly tool (Part # 5131) is then used to apply pressure to the union, which compresses to complete the connection. This is a quick and simple method of joining tubes that eliminates the fire hazards of brazing and proper torque concerns of threaded connections, while producing permanent leak-free connections.

Leaking refrigerant line at spring lock connection.

Repaired line.
