**DIGITAL TORQUE WRENCHES**

JET's newest series of torque wrenches is a step into the 21st century of torque application products! Digital torque wrenches measure torque in the 4 most common units used - in/lbs, ft/lbs, kg/cm, and Newton meters! Our unique, patented display screen features coloured lights on the top and bottom edges, making it easy to know when the set value has been reached even when the screen can't be read or the audible beeper can't be heard. The easy to use menu allows the user to quickly change between units of measurement, choose Peak Hold or Tracking mode, adjust the torque value, access up to 9 preset torque values and review up to 50 recorded torque values. Uses 2 AA batteries (included).

Prod. No.	Mod. No.	Drive	Length	Range	Prod. No.	Mod. No.	Drive	Length	Range
718941	JDTW-14250	1/4"	15-11/32"	13.3 - 265.5 in/lbs	718945	JDTW-12150	1/2"	20-7/8"	7.4 - 147.5 ft/lbs

**Swivel Head Ratchets**

JET's unique new swivel head ratchets are different than most flex head ratchets. Only the head rotates, keeping the overall height of the ratchet at a minimum for access to hard to reach places. The 270° rotation of the head provides access at virtually any workable angle, and has no index teeth so you can set the angle anywhere you need it. You can even use it in-line like a ratcheting screwdriver! The 72 teeth mean you're never more than 5° away from the next tooth engagement. Available in 1/4", 3/8" and 1/2" drives. A real work saving tool!
