

# AIR CONDITIONING - TIME TO GET READY TO CHILL OUT!

**CPS**<sup>®</sup> **RECOVERY, RECYCLING, RECHARGING EQUIPMENT**

**AUTOMOTIVE**

**AR2788 Model**

**Sale Price until  
June 30, 2009  
\$3195.00**

**We supply the full  
range of CPS  
Equipment, Tools  
& Replacement Parts**

The heart of the AR2788 is the proprietary 1 HP CPS Cyclone™ oil less Hybrid compatible compressor providing up to 50% faster recovery cycle rates. A unique patent pending plumbing arrangement eliminates the use of all solenoid and check valves, both being highly susceptible to in-field failure when exposed to foreign contaminants such as aftermarket A/C Sealants. The patent pending flow control technology and 6 CFM PRO-SET™ vacuum pump allows you to evacuate systems up to 50% faster. Intelligent self diagnostic capabilities, proprietary 5 level modular design layout and quality USA manufacturing all contribute to create a solid unit you can rely on to run smoothly in those busy summer months. As an added feature to the AR2788, all five modules are Takeapartable™ for ease in upgrades and maintenance.

**EASY USER SET-UP & OPERATION**

- No assembly required! Simply remove the packaging material and add refrigerant. Easy-to-follow instructional DVD and booklet included
- Multi language selectable in English, Spanish, French, German, and Chinese

**ROCK SOLID CONSTRUCTION**

- The AR2788 emulates the appearance of a professional grade mechanics tool box with all steel construction, high-gloss black enameled finish and chrome trimming
- Three integrated drawers provide convenient storage of a/c service tools and replacement filters
- Mobility around the shop floor is a breeze with heavy duty front casters and large rubber/tube tires in the rear

**PROFIT FROM SPEED**

- A critical component of the ARI J2788 standard states that a certified unit must be able to recover 95% of a 2007 Chevy Suburban's 3lb refrigerant charge (dual a/c) within 30 minutes. The AR2788 MACH 7 accomplished this task in less than 15 minutes! Earn greater return on your investment with **SPEED**
- Patent pending flow control technology enables faster and more accurate recovery, recycling and recharging

**THE ELIMINATOR™ LS3000. Electronic Refrigerant Leak Detector**

Fully automatic electronic refrigerant leak detector for all HFC, HCFC, CFC, SF6 gasses & blends. Exclusive POWERSHIFT software automatically monitors, controls & adjusts all critical instrument settings to ensure maximum leak search results under any job environment. Two separate visual LED displays enables user to pinpoint the exact location of leak source & the approximate size of that leak.

**Special Sale Price \$225.00**

**LEAK SEEKER® LS790B. Electronic Refrigerant Leak Detector**

Combines the most advanced microcomputer circuitry with field proven Ion-pump sensor technology creating a highly sensitive, accurate electronic refrigerant leak detector. Over 100 computer generated tones and a high intensity bar graph display quickly alerts the user to varying halogen concentrations. Patented automatic calibration design eliminates the need for manual balance or tick rate adjustments while the user selectable 10 sensitivity ranges enables the LS790B to detect leaks of all refrigerants.

**Special Sale Price \$185.00**

**We supply spare parts for both the Leak Seeker and Eliminator Electronic Refrigerant Leak Detectors**

**AR400 Dual R-134a & R-12**

1. Automatic Recover & Recycle
2. Programmed Evacuation, leak check vacuum hold and oil/dye injection.
3. Power charge only (no heater blanket required).
4. Recovery/recycle, vacuum, oil injection and charge.
5. Evacuation, vacuum hold, oil injection and recharge.
6. Quick charging for topping off.
7. Liquid refrigerant flush for oil removal
8. Filter change display.
9. Refrigerant inventory tracking.
